

POSTERBOARD

SUCCESSFUL PROJECT MANAGEMENT

POSTERBOARD

POSTERBOARD enables users everywhere access to view and download projects, homework and notes. Allowing users a simpler and more efficient way of meeting their deadlines. Users can also create new “Posters” that allow for text, image and video input within one document.

TARGET AUDIENCE

POSTERBOARD is targeting students and young adults in the workplace.

USE

Once an account is created users will be able to email, text or upload documents to POSTERBOARD. Users then have the option of adding a deadline that is clearly labeled and easily recognizable to aid in submission time requirements. “Posters” are easy to access and view as they are to export for submission. Access to POSTERBOARD will be both desktop and mobile to ensure users will always have a way to stay connected. A smaller feature within POSTERBOARD will allow users a plain document creation which can then be transformed with the inclusion of text, image and video. POSTERBOARD will be extremely useable with a strong, clean and efficient design that promotes accessibility and productivity.
